From the late 19th century onwards, following in the wake of Goya, Spain experienced a creative explosion that was to manifest itself in all the arts, including music. This set is an invitation to discover these composers who transcribed the innermost depths of their country's soul in works that were nonetheless closely related to developments elsewhere in Europe – hence the presence here of Ravel, the most Spanish of French musicians, alongside de Falla, Albéniz, Rodrigo, and Mompou.

le choix de
