Recital

(A Tribute to Nick Drake)

Ensemble Phoenix Munich, Joel Frederiksen

1h05 Digital HMC902111 May 2012

This time, for a change, Joel Frederiksen and his musicians have gone back in time all the way to . . . 1974. That was the year of the death, aged 26, of the British singer-songwriter Nick Drake, who was to achieve fame only some years later. In 1972 he released his finest album, *Pink Moon*, which became legendary at the end of the '70s and is here revisited in the style of a promenade through the Elizabethan era. A decidedly offbeat musical project that will surely intrigue fans of both Nick and Joel . . .
