## Stravinsky and his inheritance

"The *Firebird* and *Jeu de cartes* provide, within the same genre – the ballet – two diametrically opposed examples of Stravinsky's attitude to the concept of 'inheritance', and more precisely to the history of music itself. Though very different both in their style and in the circumstances of their gestation, these two works may nonetheless be approached through a quality they have in common: the miraculous balance they achieve between the functional element (which is subordinate to the choreography) and the organic element (which enables the music to have a life of its own)." NICOLAS DONIN  
This title was released for the first time in 2001.
